

PRODUCT DATA SHEET

SKU:	3-22882412
Description:	Lined Molton full leather glove with Kevlar yarn
Normative:	EN ISO 21420: 2020 sensitive 1 EN 388 : 2016 + A1: 2018 3243X EN 12477 2001 Type A EN 407 2020 412142 ANSI/ISEA 105: 2016 cut resistance level A2
Packaging :	12 pair / master box 4 x 12 pair
Size:	10
Colour:	Red
Material:	Cow split leather with lining and cotton molton inner glove

Description of product:

- Sturdy glove made of cow split leather and Kevlar yarns
- Thermal lining that limits heat transfer by Molton insulation
- Comfortable cotton inner glove

This strong glove offers protection against heat, flames and impact on hands.

Due to the lining, the finger feeling is somewhat limited, but on the other hand, the heat penetrates only slowly while your hands are protected against flames and physical impact

This glove is therefore extremely suitable for handling Li-ion batteries in thermal runaway. Move the li-ion battery quickly but safe to a safe place outside. The glove is suitable for small Li-ion batteries of EV bike, EV scooters, Phone and tablet batteries or batteries of electric tools and equipment.

! Do not use this glove for li-ion batteries with high voltage risks.

! The glove is NOT certified as protection against high voltage risks.
